

Summary of Studies Supporting USDA Product Licensure

Establishment Name	Boehringer Ingelheim Vetmedica, Inc.
USDA Vet Biologics Establishment Number	124
Product Code	1525.20
True Name	Equine Rhinopneumonitis Vaccine, Killed Virus
Tradename(s) / Distributor or Subsidiary (if different from manufacturer)	Calvenza EHV - No distributor specified
Date of Compilation Summary	February 04, 2019

Disclaimer: Do not use the following studies to compare one product to another. Slight differences in study design and execution can render the comparisons meaningless.

Study Type	Efficacy
Pertaining to	Equine herpesvirus
Study Purpose	Demonstration of efficacy against Equine herpesvirus type 1
Product Administration	
Study Animals	Horses
Challenge Description	
Interval observed after challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	February 26, 2001

Study Type	Efficacy
Pertaining to	Equine herpesvirus
Study Purpose	Demonstration of efficacy against Equine herpesvirus type 4
Product Administration	
Study Animals	Horses
Challenge Description	
Interval observed after challenge	
Results	Study data were evaluated by USDA-APHIS prior to product licensure and met regulatory standards for acceptance at the time of submission. No data are published because this study was submitted to USDA-APHIS prior to January 1, 2007, and APHIS only requires publication of data submitted after that date.
USDA Approval Date	February 26, 2001

Study Type	Safety
Pertaining to	All fractions
Study Purpose	To demonstrate safety under field conditions in horses including pregnant mare
Product Administration	
Study Animals	
Challenge Description
